- [1] Moveset ID, used for organization
- [2] Ranking of a Pokemon/Moveset's Gym Defense compared to all other Movesets for that Pokemon.
- [3] Pokemon Number. Handy if you want to group a Pokemon's movesets together.
- [4] Pokemon Name. Handy for browsing or for finding all movesets of a Pokemon (using the Find functionality) when you're sorting.
- [5] Tankiness is basically $\text{Base HP} * \text{Base Def}$. An approximation of a Pokemon's relative ability to soak damage compared to other species.
- [6] Gym Defense takes the calculated Gym Weave Damage over 100s and multiplies by Tankiness to arrive at a ranking of how much damage a Pokemon will output when defending a gym.
- [7] The Basic Attack in the moveset considered by the row.
- [8] No Weave Damage/100s is determined by figuring out the total Power achieved by doing nothing but spamming the basic attack over 100 seconds. It is highlighted in green if doing this is the best way to output damage for a moveset.
- [9] The Charge Attack in the moveset considered by the row.
- [10] Weave Damage/100s is determined by figuring out the total Power achieved over 100 seconds by using basic attack enough to charge up enough energy to do a charge attack, and then using charge attack as soon as possible to not waste energy. It is highlighted in green if doing this is the best way to output damage for a moveset.
- [11] Moveset ID, used for organization
- [12] Ranking of a Pokemon/Moveset's Gym Offense compared to all other Movesets for that Pokemon.
- [13] % of Gym Offense compared to the species's best Gym Offense moveset
- [14] Ranking of a Pokemon/Moveset's Gym Defense compared to all other Movesets for that Pokemon.
- [15] % of Gym Defense compared to the species's best Gym Defense moveset
- [16] Pokemon Number. Handy if you want to group a Pokemon's movesets together.
- [17] Pokemon Name. Handy for browsing or for finding all movesets of a Pokemon (using the Find functionality) when you're sorting.
- [18] First type for the Pokemon. Our formula use this to check STAB in concert with the moves tables, but you can also sort on it if you want to.
- [19] Second type for the Pokemon. Our formula use this to check STAB in concert with the moves tables, but you can also sort on it if you want to.
- [20] Base HP for this species. Looked up from the Species Data sheet.
- [21] Base Atk for this species. Looked up from the Species Data sheet.
- [22] Base Def for this species. Looked up from the Species Data sheet.
- [23] Tankiness is basically $\text{Base HP} * \text{Base Def}$. An approximation of a Pokemon's relative ability to soak damage compared to other species.
- [24] Duel Ability is $\text{Tankiness} * \text{Gym Offense}$. A reasonable measure if you don't often/ever dodge, as then you can only attack for as long as you can stay positive on HP.
- [25] Gym Offense takes the better of No Weave/Weave Damage over 100s and multiplies by the Pokemon's base attack to arrive at a ranking of raw damage output.
- [26] Gym Defense takes the calculated Gym Weave Damage over 100s and multiplies by Tankiness to arrive at a ranking of how much damage a Pokemon will output when defending a gym.
- [27] The Quick Attack in the moveset considered by the row.
- [28] Power of the Basic Attack. Looked up from the Basic Moves sheet.
- [29] Whether or not the Basic Attack benefits from Same Type Attack Bonus (1 if so, 0 otherwise). Compares the Pokemon types columns to the looked-up move type from the Basic Moves sheet.
- [30] Attack animation duration of the Basic Attack. Determines how quickly you can do anything else (like use the move again) after you start. Looked up from the Basic Moves sheet.

- [31] Energy gained by using the Basic Attack. Looked up from the Basic Moves sheet.
- [32] No Weave Damage/100s is determined by figuring out the total Power achieved by doing nothing but spamming the basic attack over 100 seconds. It is highlighted in green if doing this is the best way to output damage for a moveset.
- [33] The Charge Attack in the moveset considered by the row.
- [34] Power of the Charged Attack. Looked up from the Basic Moves sheet.
- [35] Whether or not the Charge Attack benefits from Same Type Attack Bonus (1 if so, 0 otherwise). Compares the Pokemon types columns to the looked-up move type from the Charged Moves sheet.
- [36] The critical chance of the Charged Attack. Looked up from the Charged Moves sheet. Note that Basic Attacks can't crit.
- [37] Attack animation duration of the Charged Attack. Determines how quickly you can do anything else (like use the move again) after you start. Looked up from the Charged Moves sheet.
- [38] Energy spent in using the Charged Attack. Looked up from the Charged Moves sheet.
- [39] How much Power is projected every time you use enough Basic Attacks to build the energy for one Charge Attack, then use the Charge Attack.
- [40] How long it takes to use enough Basic Attacks to build the energy for one Charge Attack, then use the Charge Attack.
- [41] Weave Damage/100s is determined by figuring out the total Power achieved over 100 seconds by using basic attack enough to charge up enough energy to do a charge attack, and then using charge attack as soon as possible to not waste energy. It is highlighted in green if doing this is the best way to output damage for a moveset.
- [42] How long it takes for a gym defender (who waits an additional 2s between every action) to use enough Basic Attacks to build the energy for one Charge Attack, then use the Charge Attack.
- [43] Gym Weave Damage/100s is an approximation of damage output while defending a gym determined by taking into account the fact that gym defenders wait 2 seconds before initiating any attack after the first two.
